

BUSINSPECT FS – FIELD INSPECTION & MONITORING

A field-ready app for *fleet compliance*.

A purpose-built mobile app that turns daily bus inspections into a clean, defensible record — simple enough for the rank, rigorous enough for the regulator. Your monitors get a tool they actually want to use; your leadership gets evidence they can stand behind.

- WORKS OFFLINE
- ONE-HAND OPERATION
- AUDIT-READY BY DESIGN
- RBAC · 6 ROLES

01 / Faster in the field

A whole inspection, *in a few taps*.

Tick or cross. Snap a photo if something's off. That's it. Monitors complete more inspections in less time — with cleaner data than any clipboard ever produced.

02 / Trusted by the auditor

Records that *hold up*.

Every entry is time-, location- and identity-stamped, and locked the moment it's submitted. No edits, no overwrites, no awkward questions later. Your evidence is ready before anyone asks for it.

03 / Built for the rank

Works where *signal doesn't*.

Designed for noisy ranks, dropped signal and gloved hands. Captures fully offline and syncs the moment a connection returns — so a bad network day never becomes a bad data day.

FROM MONITOR TO PM

100%

CAPTURED OFFLINE OR ON

A DAY, END TO END

01

Clock on

Monitor signs in, the shift starts, location is captured.

03

Submit

Record locks. Routed to the supervisor in seconds.

02

Inspect

Pass or fail at a tap. Photos and notes added on the spot.

04

Approve

Supervisor signs off. Evidence is filed, ready to report.

WHAT YOU WALK AWAY WITH

- Cleaner field data.** Fewer missing entries, no re-typed paper notes, no "I'll do it later".
- Faster oversight.** Supervisors review on the same day, not at the end of the week.
- Defensible reporting.** Every record carries the time, place and person behind it.
- Confident rollouts.** A platform built for fleets like yours, ready to scale beyond the pilot.

Move your inspection programme *off paper*, onto a record regulators trust.
