

Events-Web automates the entire event lifecycle — registration, bookings, admission and post-event evaluation — with sophisticated in-event interaction and **immediate analysis of sentiment and feedback**. One secure, web-based system that carries your organisation's own branding.

One platform, every step

- Self-service registration for delegates and organisations
- Publish events with multiple dates, times and venues
- Applicants choose preferred dates; you approve with one click
- Booking limits, cancellations and fully-booked control
- Every confirmation and reminder emailed automatically

Why organisations choose Events-Web

Complete automation

Registration, admission and post-event evaluation run themselves — no spreadsheets, no phone-arounds.

Instant insight

Sentiment and feedback are analysed the moment delegates respond — act while it still matters.

Full control

Manage users, organisations, venues, email templates and reporting from one admin console.

Professional communications

Branded, template-driven emails for activations, approvals, cancellations and reminders.

Audit-ready records

Every application, approval and attendance record captured and downloadable for reporting.

Your brand, your system

Deployed under your organisation's name, logo and domain — proven with live client systems.

Built for

Corporates & private sector

Government & municipalities

Event organisers & venues
